Summary

Backend-focused Full-Stack JavaScript Developer with 6 months of experience in IT and a Computer Science background, skilled in designing scalable REST APIs, server-side architectures, and database schemas with Node.js and Express.js. Experienced in authentication & authorization (JWT, OAuth), database modeling with MongoDB and MySQL, real-time systems (Socket.IO/WebRTC), and third-party API integration, with working knowledge of React.js for full-stack delivery. Comfortable owning a feature end-to-end – from API design to deployment – and adept at leveraging AI tools (Claude, ChatGPT - Codex) to ship production-ready backend systems faster. Seeking opportunities as a Backend or Backend-leaning Full-Stack Developer.

Employment Details

InfyStrat Software Services | MIS Analyst

Feb 2026 - June 2026

- Analyzed data trends across weekly operational reports and built 5+ interactive dashboards in Excel/Power BI, reducing manual reporting effort and enabling faster, data-driven decisions.
- Coordinated with 3+ cross-functional teams to collect, organize, and present operational data clearly to stakeholders.
- Improved reporting efficiency and data presentation through better organization and visualization practices.

Skills

- **Backend & Server-Side** : Node.js, Express.js, REST API Design, Authentication & Authorization (JWT, OAuth), Middleware Architecture, WebSockets (Socket.IO), WebRTC, Server-Side Validation & Error Handling.
- **Databases** : MongoDB (Mongoose, Schema Design, Aggregation), MySQL (SQL, Relational Modeling), Database Design & Optimization, CRUD Operations.
- **Backend Practices** : API Architecture, Microservice-Oriented Design, Third-Party API Integration (AI/LLM APIs), Session & Token Management, CI/CD Pipeline (Basics), Docker (Basics).
- **Frontend Knowledge** : React.js, Redux, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Material-UI, Responsive & Mobile-First Design, Component-Based Architecture.
- **Programming Languages** : JavaScript, Python.
- **AI Tools** : Claude, ChatGPT (Codex) – Building & creating backend systems/apps using AI-assisted tools, Prompt Engineering, Rapid Prototyping.
- **IDEs/Tools** : Git, GitHub, VS Code, Postman, Docker (Basics), CI/CD Pipeline (Basics).
- **Core & Soft Skills** : Analytical Reasoning, Problem Solving, Attention to Detail, Communication, Team Collaboration, Time Management, Cognitive Flexibility.

Certification

Full Stack Web Development — Apna College (by Shraddha Khapra) **Full Stack Web Development Bootcamp** — (Dr. Angela Yu)
Complete AI Engineer — Apna College (by Shraddha Khapra) **Anthropic Claude Code 101** - (by Anthropic Education)

Independent Projects

WanderHous – Travel & Accommodation Booking Platform (*Travel & Hospitality*) [Deploy Link](#) | [GitHub Link](#)

- Designed the backend for a full-stack travel booking platform: MongoDB schemas for listings, users, and reviews, supporting 50+ sample listings with image upload.
- Built REST APIs for listing/search, session-based auth, review & CRUD operations, and an AI description-generation feature via the Llama model API.
- **Tech Stack**: Node.js, Express.js, MongoDB (NoSQL), HTML, CSS, JavaScript.

TalkSy – Real-Time Video Conferencing Platform (*Communication Platform*) [Deploy Link](#) | [GitHub Link](#)

- Architected the server-side signaling/session layer for a video calling and chat platform using WebRTC for peer-to-peer media and Socket.IO for low-latency chat/presence.
- Implemented authentication and secure meeting-room access control on the backend, plus a responsive React UI for call controls and chat.
- **Tech Stack**: Node.js, Express.js, MongoDB, React, HTML, CSS, JavaScript.

Stock-Xchange – Real-Time Stock Trading Platform (*Fintech*) [Deploy Link](#) | [GitHub Link](#)

- Built the backend of a full-stack MERN trading platform: JWT auth, MongoDB schemas for portfolios/holdings/transactions, and APIs for real-time market data.
- Engineered server logic for portfolio management and an AI trading assistant, feeding a theme-aware React + Material UI dashboard with 5+ live charts.
- **Tech Stack**: Node.js, Express.js, MongoDB, JWT, React.js, Material-UI.

Prompt Verse – AI Chatbot Interface [Deploy Link](#) | [GitHub Link](#)

- Built a lightweight AI chatbot application, integrating the Llama model API on the server side to deliver real-time AI-based conversations through a clean, minimal frontend.
- **Tech Stack**: Llama model API, HTML, CSS, JavaScript.
